Junior Software Developer

Starting software developer with 1+ years of experience in backend, frontend and desktop development. Passionate on delivering the best results working with a small and focused team. I'm inspired by building software, solving difficult and interesting problems. I can't say that I am a super professional in the above. But I like to improve my skills and i really enjoy the awesomeness of software development.

TECHNICAL PROFICIENCY

<i>Backend:</i>	Django, Flask, Python.
<i>Frontend:</i>	Vue Js, HTML, CSS.
<i>Databases:</i>	Postgresql, Mysql.
<i>Version Control:</i>	Github, gitlab.
<i>Workflow:</i>	TeamCity, Jenkins, Docker.
